

[How to Get a Free Email Account](#)

This is a free service. You will not be charged in any way to use this service. If you choose this option and signup you can get your email anywhere – at home, work, on the road – anywhere. Plus, this email account **STAYS THE SAME** all the time. You can use AOL, MSN or ANY independent internet provider with this account. It does **NOT** affect any other email accounts you may currently use. NO other changes need to be made to use this free service.

If you wish to use this free service please PRINT THESE DIRECTIONS and follow the steps below:

Step # 1:

Open your browser – use Internet Explorer or Netscape and go to this address:

<http://www.yahoo.com>

Step #2: You will see this at the top of the page. Click the “Mail” blue line.

Step # 3: You will be taken to the next page called “Yahoo! Mail - Sign up for your Yahoo! ID with Mail”. Click the blue line in the picture.

Step # 4: You will be asked to fill in some questions for Yahoo!. They are shown below:

This is the first section of the page. The “Yahoo! ID” will be PART of your new email address. Since so many people use this free service please choose a long Yahoo! ID with a couple of numbers in the address. The “Password” is used to retrieve email messages you may receive. This is important – do not forget this password! The “Re-type Password” box is for verification only. It must be the same password you typed in the “Password” box.

Cap
pas:

This is the middle section of the same screen. This section will give you a “hint” if you forget your password. The “security question” is a hint – you may choose any question. The “Your Answer” is what you could give Yahoo! So they could tell you your password. The “Birthday” is required to be filled in also – you may fill in any birthday you wish – they will NOT check it. “Current Email” is optional – we recommend you do NOT fill this section in unless you want to.

If you forget your password, we would identify you with this information.

Security Question:

Your Answer:

Birthday: , (Month Day, Year)

Current Email (Optional):

mer
othe

The bottom part of the signup screen is printed below:

The “First Name” and “Last Name” will be shown on ALL email you send from this email address. Please enter what you want to be shown on email sent out from this account. Leave “Language & Content” in the default choice shown. Fill in the “Zip/Postal Code” and the “Gender”. These are not usually displayed on email messages so do not worry. Select your “Occupation” and “Industry” from the drop boxes.

“People Search Listing” is a “white pages” directory if someone wants to look your email address up at Yahoo!. This is optional. We recommend UN-checking the “Contact me occasionally about special offers and Yahoo! Features” box - this is called “Spam”. You may leave it checked if you wish. We also recommend NOT checking the boxes – “Entertainment, Home & Family, Health, etc...” This can also generate unwanted email – Spam.

When you complete the form – click the “Submit This Form” button.

First Name:	<input type="text"/>	Last Name:	<input type="text"/>	Custom Yahoo! releva based collect the Yaf service
Language & Content:	English - United States <input type="button" value="v"/>			
Zip/Postal Code:	<input type="text"/>	Gender:	<input type="button" value="—"/>	
Occupation:	[select occupation] <input type="button" value="v"/>			
Industry:	[select industry] <input type="button" value="v"/>			
People Search Listing:	<input type="checkbox"/> List my new Yahoo! Mail address for free Listing includes real name, city, state, and country.			
	<input checked="" type="checkbox"/> Contact me occasionally about special offers and Yahoo! features.			
Interests (optional):

Step # 5

If everything is successful you will see a screen with this picture:

Your Yahoo! ID (shown below – it is fake) will be used to log into the same site to retrieve your email. If you reach this screen – everything is successful! The arrow shows the author's fake Yahoo! ID used for email.

[How to Get Email Sent to You](#)

Step #1

Open your browser and go to <http://www.yahoo.com>

Step # 2

Click the “Mail” link as shown in the picture below:

Step #3

You will need to enter your Yahoo! ID and Password. You may choose to click “Remember my ID on this computer”. We suggest this option only if you use a home computer for your email. If you check that box at a public computer anyone at the computer may view your mail.

Login for email example:

If your Yahoo email address is: myFakeAddress@yahoo.com

Your Yahoo ID is : myFakeAddress

Existing Yahoo! users
Enter your ID and password to sign in

Yahoo! ID:

Password:

Remember my ID on this computer

Mode: Standard | [Secure](#)

[Sign-in help](#) [Password lookup](#)

Click the “Sign In” button.

Step #4

You will see the screen on the next page.

Click "Check Mail".

[Check All](#) - [Clear All](#)

Delete checked mail

[Check Other Mail](#) | [Empty Trash](#)

Step #6

The message will appear. An example is shown below:

Yahoo! contains many online tutorials about using your Yahoo! email account. Feel free to go over the Yahoo! site to find out how to manage your account, sync it with other accounts and using it efficiently.

There is a catch (isn't there always). You can only keep 6 MB of mail at Yahoo! . That means you only have the space for your mail as about 4 floppy disks.

We hope you enjoy the free service!

Possible Problems with your email account:

1. Your Yahoo! ID is already being used:
Select another Yahoo! ID. No person's Yahoo! ID can be the same.
2. I forgot my password
Go to www.yahoo.com and click "Mail" – follow the prompts on the screen. They will walk you through the process to retrieve this password from information you gave when you initially signed up for the free service.
3. I go to Yahoo and click mail – I see a screen with "Inbox", "Trash", "Sent" – what is it?
Yahoo! tries to remember you so there are times when you do not have to sign in – everything is still ok.
4. Does this interfere with other email accounts I have?
NO! No other changes have to be made AT ALL! Separate email accounts do not interfere with each other.

Note: Yahoo keeps extensive information online for help. It is a great resource for specific problems.
